Hello Angel,

For the roof installation at **114 Upland Cir, Toney, AL 35773, on Tuesday 1/20/26** please complete the following:

See attached Documents for reference.

Additional Information:

1. Please remove and trash the satellite dish.
2. Amy Ragan will be your Field Marshall, please reach out to her for any issues or questions.
3. The homeowner has chickens & turkeys in the coops, please ensure the nails & debris get picked up.
4. Mushroom vents will be dropped off by Amy Ragan.

Completion Form Link:

[Completion Form – Smartsheet](#)

Photo Requirements:

- 10 photos during tear-off
- 10 photos after completion
- Be sure to capture all sides (Front, Left, Right, Rear, etc.)

Additional Notes:

- Upload receipts for any additional materials purchased
- Add any notes we should be aware of regarding the project

Thank you for your attention to detail and timely submission for this project.

Hey Angel,

Quick update: we will be doing a new ridge vent cutout instead of the mushroom vents, 10 Pieces will be purchased and brought on site from one of our team!

Thanks!

Got it, thank you. The old mushroom vents are nonpower ? If they have power , I'll need the breaker off so I can
undue the wires

They likely have power.

I will ask the homeowner to turn the breaker off for the attic space/roof vents. Please confirm you can undue wires
on the roof and won't need access to the attic space through the home?

I won't need access to the attic. Just the breaker off will do the trick

Homeowner confirmed he did not see any wires running up to the vents from the attic.

We should be good to go.

THanks Angel!
